Education

- Currently pursuing Bachelor of Technology at Invertis University (2022-2026), with a current CGPA of 6.9.
- Completed Higher Secondary (10th) in 2022 with a score of 75.3% from UP Board.
- Completed Senior Secondary (12th) in 2024 with a score of 65.6% from UP Board.

Skills

- Programming: Python (Advanced), C++ (Intermediate), Java (Basic), JavaScript, HTML/CSS
- AI/ML Frameworks: TensorFlow, Scikit-learn, Keras, Pandas, NumPy
- Tools & IDEs: Git, GitHub, Jupyter Notebook, Visual Studio Code
- Visualization: Tableau, Power BI, Matplotlib
- Databases: MySQL, MongoDB
- Other: REST API, FastAPI, Agile/Scrum

Experience

EduSkills Academy(Google for Developers)	Oct 2025 – Dec 2025
AI-ML Intern	Virtual
- Machine Learning Fundamentals: Achieved a Grade 'O' (Outstanding) in a 10-week virtual internship program supported by Google for Developers. - Model Development: Worked on implementing and training machine learning models, focusing on data preprocessing and algorithm selection. - Statistical Analysis: Leveraged Python libraries to analyze datasets and visualize trends to improve model accuracy. - AI Solutions: Explored real-world applications of Artificial Intelligence and Machine Learning through hands-on project modules and assessments.	

EduSkills Academy	Jan 2026 – Mar 2026
Java Full Stack Intern	Virtual
- End-to-End Development: Completed a 10-week intensive program focused on building scalable web applications using the Java ecosystem. - Backend Engineering: Developed server-side logic and RESTful services using Core Java, Spring Framework, and Spring Boot. - Frontend Design: Created responsive user interfaces utilizing HTML5, CSS3, Bootstrap, and JavaScript/jQuery. - Database & Persistence: Integrated MySQL databases using Hibernate (ORM) for efficient data mapping and retrieval. - DevOps Basics: Managed project code and collaborated through Git and Version Control systems.	

Projects

Bank Automation System

Java, Spring Boot, MySQL, Hibernate, Bootstrap

- Secure Core Banking: Developed a full-stack application to automate banking operations including account creation, fund transfers, and transaction history tracking.
- Database Management: Architected a relational schema in MySQL using Hibernate ORM to ensure data integrity and secure financial records.
- Responsive UI: Built a dynamic customer dashboard using Bootstrap and JavaScript for a seamless user experience.

Road Accident & Severity Prediction

Python, Scikit-learn, Pandas, Matplotlib

- Risk Analysis: Developed a classification model to predict accident severity by analyzing variables like weather, lighting, and road conditions.
- Data Visualization: Utilized Seaborn and Matplotlib to identify high-risk zones, providing data-driven insights for safety recommendations.

House Price & Weather Prediction Suite

Python, Linear Regression, Random Forest

- Real Estate Valuation: Engineered a predictive tool for house prices using Random Forest algorithms, achieving high accuracy by analyzing location and square footage.
- Meteorological Forecasting: Implemented a time-series analysis model to forecast temperature and humidity based on historical climate datasets.

Certifications

LLM for Young Developers | Meta, IndiaAI & NASSCOM | Feb 2026
Getting Started with Artificial Intelligence | IBM SkillsBuild | Feb 2026
AI Skills Passport | Microsoft & EY | Jan 2026
Java Full Stack Internship Credential | EduSkills Academy | Mar 2026
AI-ML Virtual Internship (Grade: O) | Google for Developers & AICTE | Dec 2025
C Programming Basics | Simplilearn SkillUp | May 2025
